Your Next SOC Analyst, Cybersecurity Trainee, IT Security Support, Security Operations

B.Tech Computer Science and Engineering (AI & ML) student with CompTIA Security+ and CSX Cybersecurity Fundamentals (CSXF) certifications. Cyber Security Analyst intern at TechCiti Technologies Private Limited with hands-on experience in SOC operations, SIEM monitoring, incident response, alert triage, log analysis, IOC identification, network traffic analysis, Linux, and security documentation. Targeting SOC Analyst, Cybersecurity Trainee, Security Operations, and IT Security Support roles.

SKILLS

- **Security Operations:** Security Operations (SOC), Incident Response, Alert Triage, Threat Detection, SIEM Monitoring, Log Analysis, IOC Identification, Vulnerability Assessment Concepts
- **Networking:** TCP/IP, DNS, HTTP/S, VPN Fundamentals, Network Traffic Analysis
- **Frameworks:** NIST Cybersecurity Framework, MITRE ATT&CK (Introductory)
- **Operating Systems:** Linux (Ubuntu), Windows
- **Programming / Scripting:** Python (Basic), Java (Basic)
- **Interests:** Reading cybersecurity news and reviewing CVEs

EXPERIENCE

Cyber Security Analyst Intern

Jan 2024 – Aug 2024

TechCiti Technologies Private Limited | Bengaluru, India (Remote)

- Reviewed SIEM alerts during daily SOC monitoring and checked event details before escalation.
- Triage incidents and anomalies, separating false positives from alerts that needed immediate attention.
- Supported containment, eradication, and recovery tasks during incident response to limit disruption.
- Analyzed logs and network traffic to identify suspicious patterns and indicators of compromise (IOCs).
- Worked with IT and security teams to carry out remediation steps and update security controls.
- Kept security documentation current, supported compliance-related workflows, and helped with security awareness efforts.
- Tracked emerging threats and vulnerabilities and compared them with known IOCs for SOC reference.

CERTIFICATIONS

CompTIA Security+ (SY0-401), CompTIA

CSX Cybersecurity Fundamentals Certificate (CSXF), ISACA

SC-100: Microsoft Cybersecurity Architect – Design Solutions (Self-Study)

PROJECTS

AI-IDS-ES – Intrusion Detection Front-End, [Link](#)

- Current: Designed the front-end presentation for an intrusion detection system focused on network traffic analysis.
- Planned: Python detection logic is not implemented yet; needs a real example.

Human-Detection – WiFi CSI Human Presence Detection, [Link](#)

- Current: Documented the WiFi CSI-based approach for through-wall human detection.
- Planned: ANN/CNN classification remains in early stages; needs a real implementation example.

IntelliHire-v3 – Recruitment Workflow for Resume Parsing and Screening, [Link](#)

Present

- Current: Documented the resume parsing, candidate analysis, and screening workflow for IntelliHire-v3.
- Planned: Core recruitment logic and production implementation are not completed yet; needs an actual build example.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering (AI & ML) | Global Academy of Technology, Bengaluru, India

Aug 2024 – Present

Diploma, Computer Science & Engineering | Government Polytechnic Tumkur, Tumkur, India

Nov 2021 – Jul 2024

VIRTUAL EXPERIENCE

- Cybersecurity Analyst Simulation | Mastercard – Forage | 2024
- Reviewed simulated phishing threats and identified signs of social engineering attacks.
- Wrote security awareness messages to help users recognize and report suspicious activity.
- Reviewed SOC workflows for handling phishing incidents. Needs a real example of the work you completed in the simulation.
- Software Engineering Virtual Experience | J.P. Morgan – Forage | 2024
- Completed secure system design tasks and used Python and Java scripts during the engineering exercises. Needs a real example of the specific script or design work you completed.

ADDITIONAL INFORMATION

- Tracking cybersecurity news, CVEs, and threat intelligence updates as part of ongoing self-development. Needs a real example of how you use those updates.
- Interested in entry-level roles: SOC Analyst (L1), Cybersecurity Trainee, IT Security Support, or Security Operations roles.
- Open to full-time opportunities across India.
